

# CACTUS

THERMAL IMAGING PROTECTION RELAY

Typical application

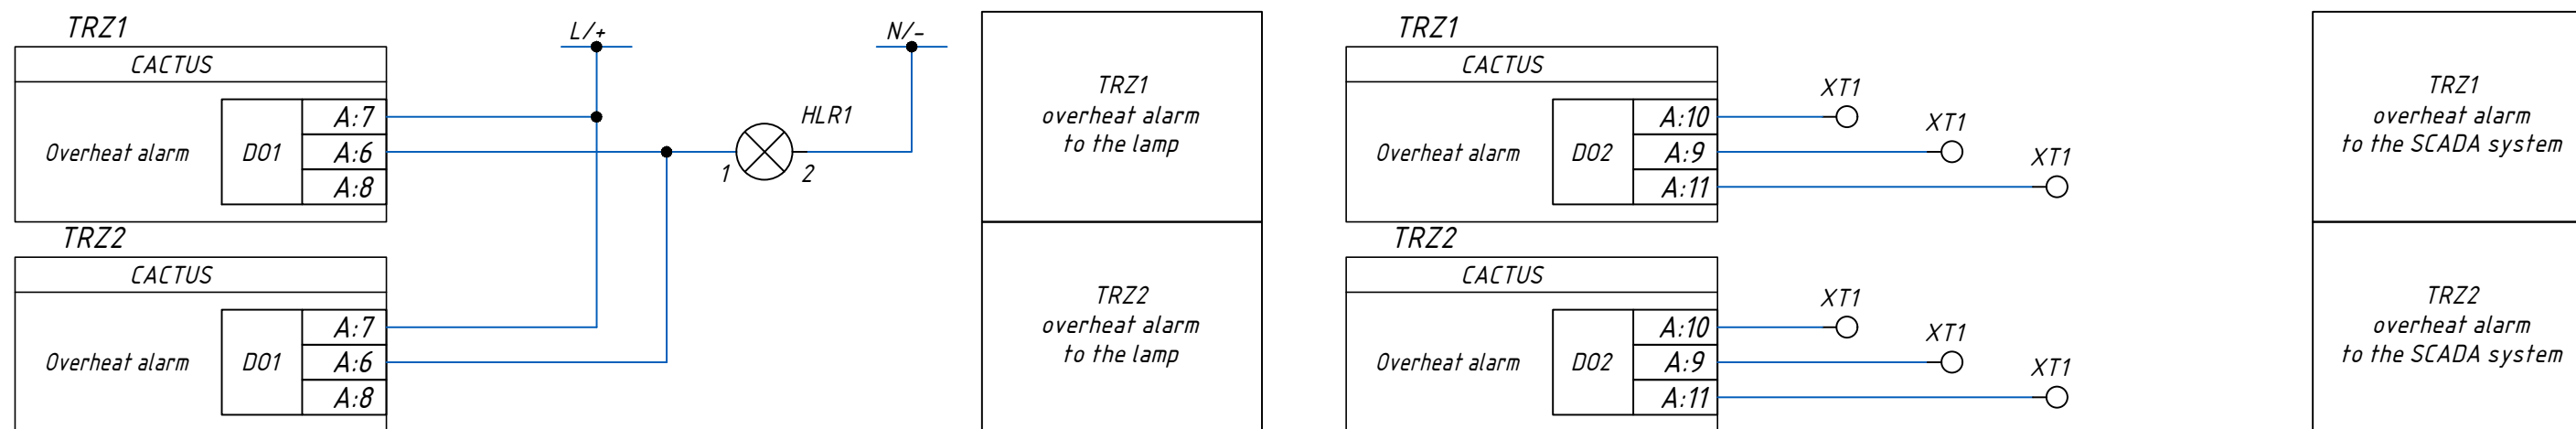

Note:  
Examples of connecting the two thermal imaging protection relays used are shown here and below. The number of relays required is determined by the structure of the protected equipment.

CACTUS. Thermal imaging protection relay. RS-485 circuits

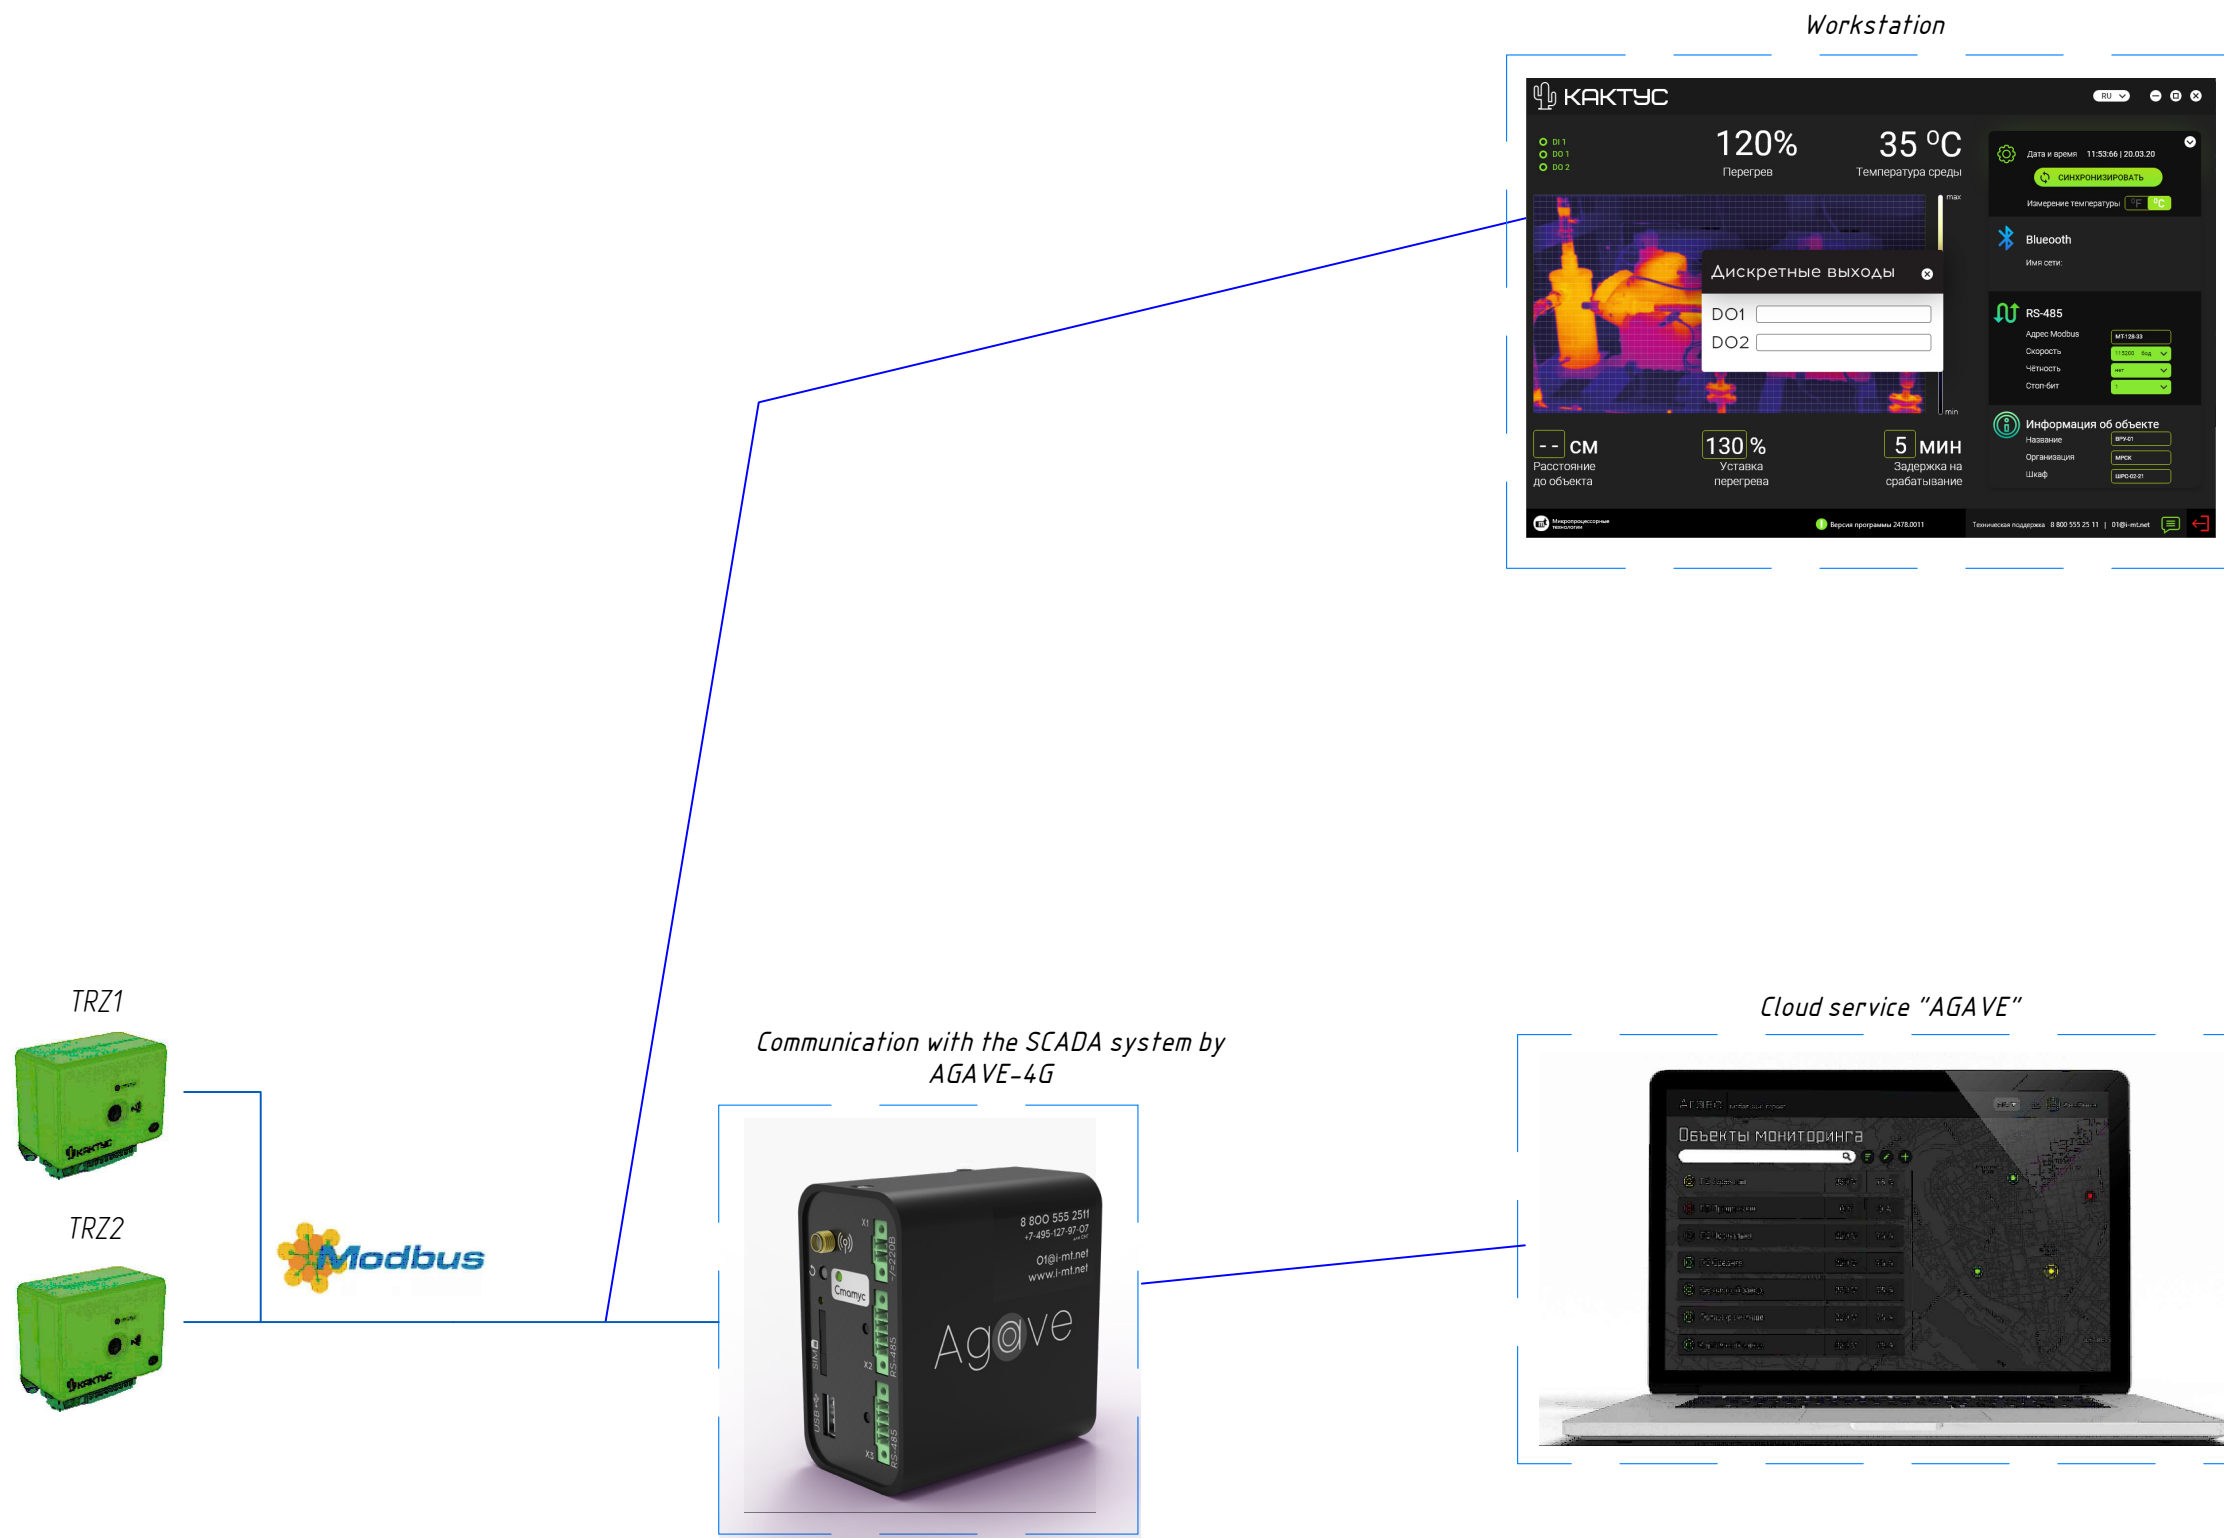

Note:  
 D01 and D02 managing by output triggering signals. Variants:  
 • Overheat alarm (OA);  
 • Malfunction alarm (MA);  
 • OA or MA.

MT.CACTUS.A.01

Workstation with application "KIWI-monitor"

Data Acquisition and analysis by cloud service "AGAVE"

Note:  
No splitters are displayed in the diagram.

"AGAVE" option:  
1. User manual MT.AGAVE-4G.UM is available via link: <http://i-mt.su/wp-content/uploads/2021/03/AGAVE.pdf>  
2. You can take advantage of the opportunities of the cloud service by clicking on the link: <https://agave.world/>
